

SLMail Email Solution For Growth

SLMail is the perfect email server solution for enterprises of all sizes. Designed with an expandable platform, SLMail can handle an unlimited number of users. So as your company grows, SLMail can grow along with it.

- Easy to install and configure
- Intuitive interface for painless administration
- Strong Message Management capabilities
- Mailing List capabilities
- Multi-Domain Management
- Mailbox size limitations
- Information tracking
- Security capabilities

Easy to set-up and manage, SLMail allows businesses to efficiently administer, control, understand and track their email traffic.

SLMail's email server for NT / 2000 includes powerful features typically only associated with expensive enterprise level systems.

These Include:

- Multiple domains host on a single server
- Mailbox size limits by server, group or user
- Mailing list capabilities to send thousands of emails
- Web browser and server-based control panel interfaces
- Out of office auto reply

Unlike most email server solutions, SLMail does not require any specific or expensive training, so your organization can be up and running in an hour!

With SLMail you will see that you do not need an expensive enterprise level solution to obtain a reliable and scaleable email server.

System Requirements:

SLMail is compatible with all standards email Clients (Quickmail Pro, Eudora, Agent, Pegasus, Z-Mail, Netscape, Microsoft Outlook, etc.) and works entirely on open Internet standards.
